Statement by DBEDT Director James Kunane Tokioka

Overall travel to the Hawaiian Islands was soft for April with total visitors by air decreasing 10.5 percent from April 2023. This is the first month that arrivals to O'ahu decreased since March 2021. The decrease was partially due to Easter falling on March 31, which pushed spring break travel into March instead of April. Easter 2023 was on April 9, which affected the year-over-year performance. In reviewing a forecast provided by Jerry Gibson of the Hawai'i Hotel Alliance, spring bookings are not picking up as indicated by previous estimates.

The cruise market performed well in April with visitors who came via out-of-state cruise ships registering the second highest monthly arrival on record. This market typically has less impact on the destination than visitors who travel by air as cruise travelers often participate in group tour activities versus exploring the islands individually and renting cars.

With the Hawai'i Tourism Authority's Mākaukau Maui campaign and targeted efforts showcasing Maui's readiness to welcome visitors, DBEDT is committed to supporting the state and Maui's economic recovery.
