PREFACE

The 2017 Visitor Plant Inventory (VPI) report was produced by Kloninger & Sims Consulting LLC for the Hawai'i Tourism Authority (HTA).

As part of the Tourism Research program, HTA conducted a survey on statewide visitor accommodations in 2017. This report provides the results of this survey presenting statistics on the number of visitor units, island distribution, type of property and class of rooms. As in previous reports, island and district names were written in proper Hawaiian language orthography. However, individual property names were not written in the same manner unless the words were easily identifiable (i.e., island names).

The Hawai'i Visitors and Convention Bureau (HVCB) first published the Visitor Plant Inventory in 1964 and every year thereafter, except 1995 and 1998. HVCB did not conduct a survey in 1995 and did not publish hard copies of the report in 1998. The Department of Business, Economic Development and Tourism (DBEDT) published the VPI reports annually from 1999 through 2008.

The 2017 Visitor Plant Inventory report is posted on the HTA website: www.hawaiiitourismauthority.org/research.

For further information, contact HTA at (808) 973-2255, www.hawaiiitourismauthority.org.

Executive Summary

Visitor Unit Counts by Type of Accommodations, 2007-2017

*Other includes Apartment Hotels, B&Bs, Hostels, and Other units.

The number of visitor units in the State of Hawai'i increased by 1.6 percent in 2017 for a total of 80,336 units.

The large majority of the lodging supply in the State was made up by hotel units (55.3 percent) with 44,431 units, slightly higher compared to 2016 (1.2 percent) due to new hotels opening and hotel properties reopening after renovation or redevelopment. 60.1 percent of all hotel rooms were located on O'ahu (27,102).

Vacation Rental units¹ accounted for 15.8 percent of all lodging units in 2017 (12,659 units), growing by 3.9 percent over 2016. Vacation Rental² include condominium units, houses, villas, cottages, and private and shared rooms.

The number of visitor units at Timeshare properties saw an increase in 2017, now accounting for 11,062 units (3.2 percent).

Condo Hotels, accounting for 10,875 visitor units. Condo Hotels consist of individually deeded condominium units but provide hotel-like services such as a front desk and often daily housekeeping service. The overall number of Condo Hotel units decreased by 0.4 percent. Most of the State's Condo Hotel supply was located on Maui (4,402 units) and O'ahu (4,246 units).

¹ Vacation Rental Units were referred to as Individual Vacation Units ("IVU") prior to the 2014 VPI.

² The VPI's definition of Vacation Rental is presented on page 50. VPI Vacation Rentals should not be equated with other definitions of transient vacation rental units as described by county-level ordinances.

Overview of Methodology

Visitor Plant Inventory & Individually Advertised Units in Hawai'i Reports

Data Collection

The VPI data were gathered by surveying properties in the VPI database. Additional surveyed properties were identified using a variety of data sources.

The supplemental Individually Advertised Units data were based on a point-in-time data extraction from three vacation rental booking sites. The number of properties listed on these booking sites is highly fluid because a property can be listed or unlisted based on market changes or changes in ownership. In addition, this data collection method likely over-counts the number of Individually Advertised Units due to the practice of listing rentals on multiple booking sites and the use of these booking sites as a marketing channel for traditional visitor units such as hotel rooms and timeshare stays. An estimate of the number of Individually Advertised Vacation Rentals, net of duplication is provided on page 71. It should be noted that this is only an estimate.

Terminology for Vacation Rental Units

There are different terms used in Hawai'i to identify vacation rentals, including TVRs, TVUs, IVUs and VRUs. Several of these terms are defined by county-level ordinance. The VPI uses the term "Vacation Rental Units," which is comprised of three different types of properties (VR-Condo, VR-House, and VR-Other) and should not be used interchangeably with other legally defined terms.

When to Use VPI vs. Individually Advertised Unit data

The VPI provides data on the supply of visitor accommodations in the State of Hawai'i **across all property types**, in a time series that dates back to 1965.

The Individually Advertised Unit data provide supplemental information primarily on the evolving segment of vacation rentals, including important data on pricing and the geographical location of the vacation rental supply.

Visitor Plant Inventory

State of Hawai'i

The total number of units in the State of Hawai'i visitor plant inventory for 2017 increased to 80,336 visitor units, 1.6 percent higher than in 2016 [Figure 2].

Nearly half (47.9 percent) of the State's visitor units were located on O'ahu, with the majority of units located in Waikiki. Maui had the second most number of visitor units (26.5 percent) followed by Hawai'i Island (14.0 percent) and Kaua'i (11.0 percent). Moloka'i and Lāna'i had the fewest lodging units and combined totaled less than one percent of all Hawai'i lodging units.

The large majority of the lodging supply in the State was made up by hotel units (55.3 percent). Vacation Rentals, Timeshare units, and Condominium Hotels accounted for 15.8 percent, 13.8, and 13.5 percent of all lodging units, respectively.

Figure 3: State of Hawai'i - Inventory by Island (Properties)

Figure 4: State of Hawai'i - Inventory by Property Type

Figure 5: State of Hawai'i - Inventory by Price Class

Inventory by Island

Island of Hawai'i

The overall visitor unit count on Hawai'i Island decreased by 0.6 percent from 2016.

- Hotels continued to comprise the bulk of Hawai'i Island's visitor plant inventory (6,512 units) [Figure 6].
- The decrease in hotel units on Hawai'i Island was due to renovations of the Hapuna Beach Prince Hotel, which resulted in a decrease in total rooms.
- Waikoloa Beach Marriott Resort & Spa went through redevelopment and opened Marriott's Waikoloa Ocean Club with 112 timeshare units.
- In 2017, a higher proportion of visitor units were categorized in the Luxury category compared to previous years (27.9 percent).

Figure 6: Hawai'i Island - Inventory by Unit Type

Figure 7: Hawai'i Island - Inventory by Property Type

Figure 8: Hawai'i Island - Inventory by Price Class

Kaua'i

The number of visitor units on Kaua'i totaled 8,821 units, a 4.5 percent increase over the previous year.

- Hotel units made up the largest share of visitor units on Kaua'i (32.3 percent) followed by Timeshare units (28.9 percent).
- No Apartment Hotels or Hostels were reported on Kaua'i in 2015 or 2016.
- The largest percentage of Kaua'i's visitor units continued to fall in the Luxury price class (36.7 percent) in 2017.
- Koloa Landing Resort at Poipu opened in 2017, as part of the rebranding under the Marriott Autograph Collection.

Figure 9: Kaua'i - Inventory by Unit Type

Figure 10: Kaua'i - Inventory by Property Type

Figure 11: Kaua'i - Inventory by Price Class

Maui

The overall number of lodging units on Maui totaled 21,250 units, a slight decrease over the previous year. (-1.0 percent).

- Hotel Rooms continued to account for the largest share of Maui’s visitor units in 2017, with about 36.4 percent of the supply. VRUs represented about 25.8 percent of Maui’s visitor accommodation units in 2017, as VRU’s share of Maui’s total supply of visitor units has increased in recent years.
- The majority of Maui’s visitor units were in the Luxury and Deluxe price classes as the bulk of Maui’s visitor accommodation supply consists of high-end properties in the luxury regions of Wailea and Lahaina - Kā’anapali - Nāpili - Kapalua [Figure 14]. Luxury and Deluxe priced visitor units combined represented 79.4 percent of the supply.
- Westin Nanea Ocean Villas opened with 195 new timeshare units in April 2017.

Figure 12: Maui - Inventory by Unit Type

Figure 13: Maui - Inventory by Property Type

Figure 14: Maui - Inventory by Price Class

Moloka'i

The overall visitor unit count on Moloka'i increased in 2017, with increases in the Vacation Rental category. This due to an increased in reported VR Condos available at condo hotels.

- There were no Hotels, Hostels or Apartment Hotels on Moloka'i in 2017 [Figure 16].
- All of Moloka'i's units fell within the Standard or Budget price classes (57.1 and 42.9 percent, respectively) [Figure 17].

Figure 15: Moloka'i - Inventory by Unit Type

Figure 16: Moloka'i - Inventory by Property Type

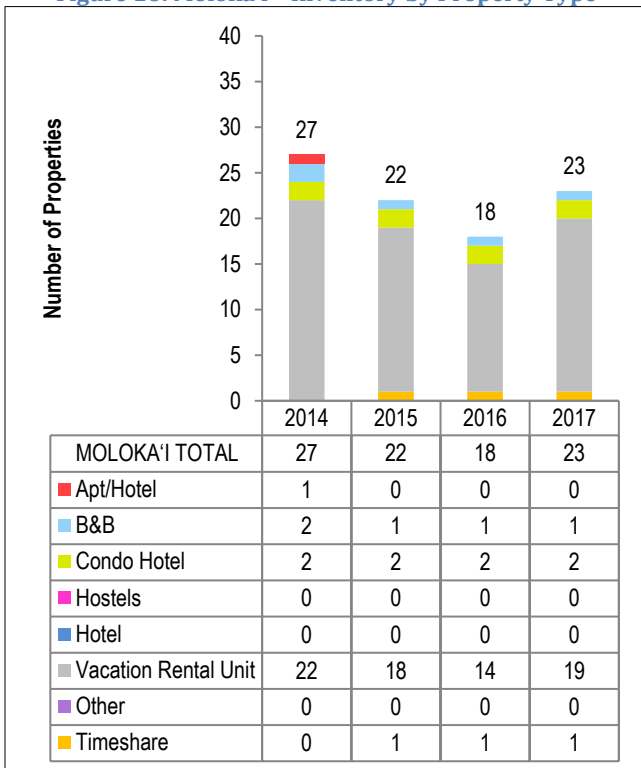

Figure 17: Moloka'i - Inventory by Price Class

Lānaʻi

Lānaʻi’s visitor supply has been relatively stable and dominated by two Four Seasons-branded hotels. In the last couple of years, the two main hotels on the island closed for renovations.

- The Four Seasons Resort Lodge at Koele, which has been closed since January 2015, remained closed in 2017.
- Hotel units still comprised the majority of Lānaʻi’s lodging supply (97.8 percent). All other property types totaled only 5 units [Figure 18].
- Nearly all of Lānaʻi’s units fell within the Luxury and Deluxe price classes (93.4 percent) [Figure 20].

Figure 18: Lānaʻi – Inventory by Unit Type

Figure 19: Lānaʻi – Inventory by Property Type

Figure 20: Lānaʻi – Inventory by Price Class

O'ahu

The number of visitor units on O'ahu increased (+3.0 percent) to 38,508 in 2017. The increase was driven by the growth of Vacation Rental Units.

- Hotels continued to dominate O'ahu's overall supply in 2017, accounting for about 70.4 percent of the supply.
- The O'ahu hotel supply saw an increase over the previous year due to several new hotels opening including Hampton Inn & Suites, Hyatt Centric Waikiki Beach, openings and reopening after renovations or rebranding (Hawaii Prince Hotel Waikiki, The Laylow Autograph Collection, and Maile Sky Court), whi
- Condo Hotels were the second largest accommodation type, representing 11.0 percent of all units, followed by Timeshare (8.6 percent) and VRUs (8.5 percent).

Figure 21: O'ahu - Inventory by Unit Type

Figure 22: O'ahu - Inventory by Property Type

Figure 23: O'ahu - Inventory by Price Class

Inventory by Type

Hotels

Hotel units made up the largest share of all visitor units in the State, and O'ahu continues to supply the majority of these units (60.1 percent).

Figure 24: Hotel - Inventory by Island (Units)

Condominium Hotels

The statewide number of Condo Hotel units decreased slightly (0.4 percent). Condo hotel units comprised 13.5 percent of statewide visitor units in 2017.

Figure 26: Condo Hotel - Inventory by Island (Units)

Figure 25: Hotel - Inventory by Island (Properties)

Figure 27: Condo Hotel - Inventory by Island (Properties)

Timeshares

The state’s timeshare supply increased over the previous year (3.2) with little change compared to the previous year. The largest share of units are still located on Maui and O’ahu, with 30.5 and 30.1 percent of all units, respectively [Figure 28].

Figure 28: Timeshare – Inventory by Island (Units)

Bed & Breakfasts

B&B units across the State decreased by 8.2 percent compared to 2016, due to property closures and reclassification to other unit types.

Figure 30: B&B – Inventory by Island (Units)

Figure 29: Timeshare – Inventory by Island (Properties)

Figure 31: B&B – Inventory by Island (Properties)

Vacation Rental Units

The number of Vacation Rental units (VR units) in the state increased over the previous year (3.9 percent). Maui has the largest inventory of Vacation Rental units with a 30.5 percent share

of the state's total supply. The majority of Vacation Rental units were represented by VR Condo units, representing 91.0 percent of all reported Vacation Rental units.

Figure 32: Vacation Rentals - Inventory by Island (Units)

Figure 34: Vacation Rentals - Units by Type

Figure 33: Vacation Rentals - Inventory by Island (Properties)

Apartment/Hotels

The overall State supply of Apartment Hotel units was relatively unchanged over the previous year (+2.0 percent). The number of reported properties remained the same in 2017.

Figure 35: Apartment/Hotel - Inventory by Island (Units)

Figure 36: Apartment/Hotel - Inventory by Island (Properties)

Hostels

The overall number of Hostel properties in the State increased in 2017 (1.3 percent).

Figure 37: Hostel - Inventory by Island (Units)

Figure 38: Hostel - Inventory by Island (Properties)

Other

The “Other” category, which includes lodges, inns, and other forms of accommodations, saw a slight decrease in units in 2017 (2.3 percent).

Figure 39: Other – Inventory by Island (Units)

Figure 40: Other – Inventory by Island (Properties)

2017 VISITOR PLANT INVENTORY: LIST OF PROPERTIES

The 2017 VPI property list is available online in a companion workbook. Notes for the list are shown below.

Explanation of Categories

- Island = Island on which the property is located
- Area = Area of the island where the property is located
- Name = Name of property
- Type = Unit Type
- Available Units = Number of units available for visitor use
- Change from 2016 = Difference in available units between 2017 and 2016 for entire property.
- Opened = Year property first opened

Class

- B Number of visitor units classified as Budget (Up to \$100 per night)
- S Number of visitor units classified as Standard (\$101 to \$250 per night)
- D Number of visitor units classified as Deluxe (\$251 to \$500 per night)
- L Number of visitor units classified as Luxury (Over \$500 per night)
- N/A Not available

Last Response

- 2017 Survey form received in 2017
- 2016 No response received in 2017, information received in 2016
- 2015 No response received in 2017, information received in 2015

Notes

- A – Visitor unit count estimated by AOUO/Resident Manager/Property Manager (for units managed by others)
- B – Visitor unit count estimated by Owner/Operator (for units owned/managed by others)
- C – Visitor unit count estimated by county real property tax departments
- D – Visitor unit count estimated by HTA
- E – Visitor unit count estimated based on prior survey response.
- F – The property’s reporting method changed from 2016
- G – Selected units closed for renovation/reconstruction (balance of the property open for business)
- H – Units reopened after renovation/reconstruction
- I – Added units (new construction)
- J – Survey responses indicate additional units available for transient rental
- K – Survey responses indicate units no longer available for transient rental
- L – Survey responses indicate change in supply
- M – Visitor unit count is for beds, not rooms, for Hostel property

METHODS AND PROCEDURES: Visitor Plant Inventory

The 2017 Visitor Plant Inventory presents the results of HTA's enumeration of visitor accommodations in Hawai'i. Existing visitor accommodations as of May 1, 2017 as well as planned developments and additions to existing developments were catalogued.

Visitor Plant Inventory Survey: Information about transient accommodations was gathered mainly from a survey of existing visitor accommodation properties and management companies. Survey forms were sent to general managers, property managers and other individuals who could provide information about the property. The survey provided information about available units, planned additions and other information presented in this report.

Survey forms were distributed to all properties that participated in the prior year's survey and additional properties identified through the association survey (below) and internet research. Information for hotel and condominium hotel properties that participate in STR, Inc's monthly survey were also cross-verified against STR, Inc's' property database.

Survey forms were distributed via mail, email, and fax. If no response was received, follow-up telephone calls, emails, and/or faxes were made to the property to remind them to complete and return the form. Subsequently, if no response was received after the follow-ups, an Internet search was conducted to determine if the property was still in business and telephone calls were made to verify unit counts and types. If no response was received or no data was found on the Internet, but information was available from prior years (2014, 2015 and 2016), that information was included and so noted. If no response was received from a property and information was available from the association survey, such information was included and so noted. If no survey form was returned and no information

was available from previous years or other sources, the property was listed as a non-respondent.

Association of Unit Owners Manager Survey: A survey of Association of Unit Owners ("AOUO") management companies for projects located in resort areas was conducted to gather information about transient rental units located within the project, especially VRU rental houses/villas and VR-condo units. AOUO managers were also asked to identify rental management companies associated with such visitor units and also IVU-condo units which are being marketed by owners, including participation in Visitor Rental By Owner ("VRBO"), Home Away, etc. programs. Any identified rental management companies that were not previously contacted were sent VPI survey forms. Data from this survey was also used to estimate VRU-condo units for a given project.

Contact information included in the State of Hawai'i Department of Commerce and Consumer Affairs' AOUO Contact List and Developer's Public Report/Association Biennial Registration database was used in the administration of this survey. Letters and survey forms were distributed via mail, email, and fax and follow-up telephone calls, emails, and/or faxes were also made.

Association Letter: Continued in 2017, this survey's purpose was to gather contact information of associations whose members were transient visitor accommodations in the State of Hawai'i. Letters were sent to these associations to request member accommodation contact information, from which the mailing list was updated and new accommodations were contacted via mailing as described above.

Timeshare Properties: Information on timeshare properties were gathered through the survey questionnaire, which asked for

information on the number of units *registered* as timeshare and units *operated* as timeshare. The number of units registered included those that were available for sale in a timeshare program (as well as those already sold in such a program). The number of units operated represented the units that were in use. Certain timeshare properties have the ability to split a given registered timeshare unit into more than one operated visitor unit (i.e. it may be possible for a two-bedroom unit to be rented as two keys: one studio unit and one 1-bedroom unit).

As of the 2009 VPI, the listing of timeshare inventory presented in Table 8 has been restated with registered units representing the number of units that were available to be sold as part of a timeshare program and operated units were defined as number of salable keys that were operated for visitor use. In some cases, the number of operating units exceed the number of registered units for a given timeshare property.

The available timeshare units listed in Tables 3 and 5 and their related charts were the total number of operated units. The number of timeshare properties listed in Tables 2 and 4 were the properties with the majority of units classified as timeshare. However, the number of available units listed with the timeshare category included those units that were cross-listed under the other property types. The 2017 Current Visitor Plant Inventory details the unit types available at each property.

Starting with the 2009 VPI, certain timeshare operators reported their inventory counts in terms of individual guest rooms (keys) rather than timeshare units previously reported. For example, a two-bedroom timeshare unit may, depending configuration, be rented separately as two guest rooms: a one-bedroom unit and as a studio unit. This change in reporting procedure resulted in a higher inventory count for certain timeshare properties, but did not necessarily reflect a change in the physical plant.

Cross Verification of Data: Responses from selected hotels, condominium hotels, and timeshare properties were cross verified against Smith Travel Research's property database and data from the American Resort Development Association.

Responses were also cross-verified against data received from the four counties, including real property classifications, bed and breakfast license data, and transient vacation unit (TVU) license data.

Unit Type Classification: Each unit reported in the survey was assigned a unit type based on HTA's type definitions [page 49]. For the purposes of classification, a given property may include more than one unit type. Historically, type classifications were self-selected by the respondent but research has shown that the response was not always consistent with HTA's type definitions. In such cases, the unit type was corrected for the 2017 VPI report.

Notably, many respondents classified their units as condominium hotel due to the units' location within a condominium building, but did not have the services or amenities included in HTA's definition for a condominium hotel. These units were reclassified as individual vacation units.

Property Type Classification: Classification of property type (Tables 2 & 4) for properties with more than one unit type was determined by the majority of units on that property. Historically property type was self-selected by the respondent but research has shown that the response was not always consistent with HTA's type definitions [page 49].

Planned New Developments: Information about planned new developments was gathered with assistance from the four county Planning Offices. The information was reprinted here and includes projects and developments that have achieved some level of jurisdictional approval. That was to say,

these developments were a step beyond the preliminary stages of development and have some “official” standing as planned developments.

DEFINITIONS

Type of Units

An individual property may include more than one type of unit. If a property has more than one unit type, the majority unit type was used to determine the property type for the purposes of this report. Units were categorized as follows:

Apartment / Hotel (Apt/Hotel): Visitor accommodations units typically located in low-rise apartment-style buildings and available for short-term rental. Units may have kitchens and laundry facilities. Front desk operations and housekeeping service are limited and sometimes non-existent.

Bed & Breakfast (B&B): A lodging facility with a limited number of guest units, available for short-term rental. Services include breakfast in the daily rental rate. Typical bed and breakfast facilities may be small, quaint inns or family homes.

Condominium Hotel (Condo Hotel): A multi-unit property legally classified as a condominium with each unit individually deeded. Generally, units are collectively placed into transient hotel rental operations, offering most of the services of a hotel, such as daily housekeeping service and front desk operations. Condominium hotel units are larger than hotel units and include studios and one- to three-bedroom units, with kitchen and laundry facilities, available for transient use on short-term rental basis (30 days or less).

Hotel: A multi-unit lodging facility that provides room accommodations on a short-term rental basis. Services often include a pool, restaurant operations, and other “away from home” services such as daily housekeeping service and front desk operations.

Hostels: An inexpensive, limited-service lodging facility, often with dormitory-style accommodations. They are available for short-

term rental and are frequently used by younger travelers.

Vacation Rental Unit (VRU): An individual vacation rental unit available for visitor use on a short-term basis (30 days or less). VRs usually include kitchens, laundry facilities, and parking garages. Services are very limited although some may include some housekeeping service.

- **Vacation Rental in a Condominium Hotel (VR-Condo):** A condominium hotel unit available for visitor use on a short-term basis. VR-Condos are not rented or managed by the condominium hotel management, but are available through individual owners, property managers, or Internet agencies.
- **Vacation Rental House (VR-House):** A single-family dwelling property available for visitor use on a short-term basis. May be a house, townhouse, duplex, multiplex, cabin, villa or cottage, where the owner does not reside on the property.
- **Vacation Rental Other (VR-Other):** Vacation rental units located in other types of properties not mentioned above. Includes private and shared rooms for visitor use and other non-traditional accommodations.

Timeshare: A timeshare is a type of property ownership in which guests acquire a shared interest in a hotel or condominium hotel unit for a specific period of time and on a recurring basis. Timeshare ownership is typically defined by intervals (a set number of days and nights of annual use) or points (a “currency”

that represents ownership and is used to establish value for seasons, unit sizes, and resort locations).

“Operated” timeshare units are those that have been sold and are currently (as of May 1) available for visitor use. “Registered” units include operated units and units that are not yet operating as visitor rentals.

Some timeshare units can be rented as one or two units as their design allows a single unit to be divided into two complete sections and operated as two units by securing a door between the sections. The number of keys

operated as timeshare reflect the number of distinct keys available for each unit.

Other: Includes lodges, inns, or any other form of property not included in the above definitions.

Owner-Occupied: Units not available for transient visitor use (30 days or less).

Not for visitor use: Includes owner-occupied units, residential rentals only, and units under remodeling.

Class of Units

The Visitor Plant Inventory survey also included questions about the class of units at each property. The subsequent tables show the percent of each class of units available by island. Units were classified as follows:

Class	Price Range (Rack Rate)
Budget	Up to \$100 per night
Standard	\$101 to \$250 per night
Deluxe	\$251 to \$500 per night
Luxury	Over \$500 per night

RE: 2017 State of Hawai'i Visitor Plant Inventory Survey

Aloha,

The Hawai'i Tourism Authority (HTA) is in the process of updating the annual State of Hawai'i Visitor Plant Inventory report, and we would greatly appreciate your support and participation in this year's survey. Kloninger & Sims Consulting LLC has been contracted by HTA to conduct the 2017 Visitor Plant Inventory (VPI) survey.

Enclosed with this letter are:

- 2017 survey form pre-filled with your responses from 2016, if applicable
- Definition sheet

Please make your corrections directly on the survey form. If your information for 2017 is identical to 2016, simply sign and return the form.

Please submit your completed survey directly to Kloninger & Sims Consulting LLC via email (survey@kloningerandsims.com). The completed form can also be faxed to Kloninger & Sims Consulting LLC at (808) 441-5320.

We would greatly appreciate receiving this information by **July 21, 2017**. If you have any questions or need assistance in filling out the survey, please call Kloninger & Sims Consulting LLC at (808) 636-3337.

Sincerely,

Daniel K. Nahoopii
Director
Tourism Research

Repeat Participant Survey Form

Please review the existing data we have for your property, which is listed in the column labeled "2016." If the data is correct as of **May 1st, 2017** simply check the box, and sign and date below. If the data is erroneous or needs to be revised, please provide the correct information in the second column and then sign and date. Definitions for each property type are listed in the **Property Type Definition Sheet on the page prior to this survey**. Please return the form to Kloninger & Sims Consulting by fax at (808) 441-5320 or via email (survey@kloningerandsims.com). For further information or clarification, please contact Kloninger & Sims Consulting LLC at (808) 467-1272. *Mahalo for your cooperation!*

If the data listed for 2016 is correct as of May 1st, 2017, please check this box and sign and date below.

Definition Sheet

VISITOR PLANT INVENTORY SURVEY DEFINITION SHEET

Apartment / Hotel	Visitor accommodations units typically located in low-rise apartment-style buildings and available for short-term rental. Units may have kitchens and laundry facilities. Front desk operations and housekeeping service are limited and sometimes non-existent.
Bed & Breakfast (B&B)	A lodging facility with a limited number of guest units, available for short-term rental. Services include breakfast in the daily rental rate. Typical bed and breakfast facilities may be small, quaint inns or family homes.
Condominium Hotel	A multi-unit property legally classified as a condominium with each unit individually deeded. Generally, units are collectively placed into transient hotel rental operations, offering most of the services of a hotel, such as daily housekeeping service and front desk operations. Condominium hotel units are larger than hotel units and include studios and one- to three-bedroom units, with kitchen and laundry facilities, available for transient use on short-term rental basis (30 days or less).
Hotel	A multi-unit lodging facility that provides room accommodations on a short-term rental basis. Services often include a pool, restaurant operations, and other "away from home" services such as daily housekeeping service and front desk operations.
Hostel	An inexpensive, limited-service lodging facility, often with dormitory-style accommodations. They are available for short-term rental and are frequently used by younger travelers.
Vacation Rental (VR)	<p>An individual vacation rental unit available for visitor use on a short-term basis (30 days or less). VRs usually include kitchens, laundry facilities, and parking garages. Services are very limited although some may include some housekeeping service.</p> <ul style="list-style-type: none"> • Vacation Rental in a Condominium Hotel (VR-Condo): A condominium hotel unit available for visitor use on a short-term basis. VR-Condos are not rented or managed by the condominium hotel management, but are available through individual owners, property managers, or Internet agencies. • Vacation Rental House (VR-House): A single-family dwelling property available for visitor use on a short-term basis. May be a house, townhouse, duplex, multiplex, cabin, villa or cottage, where the owner does not reside on the property. • Vacation Rental Other (VR-Other): Vacation rental units located in other types of properties not mentioned above. Includes private and shared rooms for visitor use and other non-traditional accommodations.
Timeshare	<p>A timeshare is a type of property ownership in which guests acquire a shared interest in a hotel or condominium hotel unit for a specific period of time and on a recurring basis. Timeshare ownership is typically defined by intervals (a set number of days and nights of annual use) or points (a "currency" that represents ownership and is used to establish value for seasons, unit sizes, and resort locations).</p> <p>"Operated" timeshare units are those that have been sold and are currently (as of May 1) available for visitor use. "Registered" units include operated units and units that are not yet operating as visitor rentals.</p> <p>Some timeshare units can be rented as one or two units as their design allows a single unit to be divided into two complete sections and operated as two units by securing a door between the sections. The number of keys operated as timeshare reflect the number of distinct keys available for each unit.</p>
Other	Includes lodges, inns, or any other form of property not included in the above definitions.
Owner-Occupied	Units not available for transient visitor use (30 days or less).
Not for visitor use	Includes owner-occupied units, residential rentals only, and units under remodeling.

APPENDIX B: Supplemental Report: Individually Advertised Units in Hawai'i

Introduction

In addition to the survey data gathered for the Visitor Plant Inventory, data extracted from four vacation rental booking sites was also gathered. The Visitor Plant Inventory has traditionally included vacation rentals as a property type. Due to the large number of vacation rental properties and the fluid nature of the vacation rental supply, however, identifying and gathering survey data from vacation rentals has been a challenge. As a result, the Visitor Plant Inventory survey has likely undercounted the actual number of vacation rental units.

The data extraction from the booking sites represents a point-in-time analysis. As properties are added to or removed from the booking sites, the number of vacation rental units advertised on the sites will change. The three booking sites analyzed were:

- Airbnb
- HomeAway
- TripAdvisor

In previous years, four booking sites were analyzed (Airbnb, ClearStay, FlipKey and VRBO). For this year's study, HomeAway replaced ClearStay and VRBO, which are both subsidiaries of HomeAway. TripAdvisor replaced its subsidiary FlipKey. The decision to revisit the composition of the sample was dictated by the absorption of ClearStay into the HomeAway site, with corresponding termination of ClearStay as a standalone platform. While ClearStay had been the site with the fewest listings, the listings on the site included verified property addresses, which provided unique identifying information that was used to identify duplicate listings on other booking sites

It should be noted that the numbers cited in this section likely overstate the number of individually advertised vacation rental units. Because of the lack of unique identifying information associated with each vacation rental unit listed on the booking sites, it is currently not possible to identify and eliminate much of the double and triple counting that occurs when a property is listed on multiple booking sites. Where possible we have eliminated duplication across the booking sites but were only able to do so when listings contained unique identifying information, primarily a street address or condominium name and unit number. In some cases we identified duplicate listings based on the listing name, price point or listing photos. A relatively small percentage of the listings included the property address or condominium unit number. Among those listings that did include such unique identifiers, we found a high degree of duplication on other booking sites.

The three booking websites represent relatively new channels of distribution for vacation rental properties, many of which have been in operation for decades and have historically been counted by the Visitor Plant Inventory survey. It is therefore not appropriate to add the number of individually advertised vacation rental units discussed in this section to the total number of visitor units from the Visitor Plant Inventory survey. There was some degree of overlap between the survey data and the booking site data, making the estimate subject to a good deal of uncertainty. At the end of this section an estimate of the actual number of individually advertised vacation rental units is presented, net of estimated double- and triple-counted units.

Individually Advertised Vacation Rentals Trends

Based on data extracted from the three booking websites, there were 38,100 individually advertised vacation rental units listed in the State of Hawai'i in 2017, a 17.0% increase from the 2016 count, as shown in Table 14. Some of the increase could be attributable to a change in the business model of HomeAway, which has been shifting from charging hosts a flat fee to charging a percentage of booking revenue. This change has likely encouraged hosts that had previously listed their units on one of the other sites to also list on HomeAway.

Maui continued to have the largest number of individually advertised vacation rental units in 2017, with 13,418 units. Maui also saw the most growth compared to 2016, with the number of units increasing by 24.4%. O'ahu reported the smallest increase in number of individually advertised units, with the 2017 count increasing by 7.3%.

The total number of bedrooms available in individually advertised units increased by 43.5% in 2017, as can be seen in Table 15. This suggests that there was a shift toward larger units during the year. It is possible that an increase in the number of HomeAway listings contributed to the faster growth in the number of bedrooms, due to HomeAway's strength in the VR House segment.

Table 14: Individually Advertised Units by Island

Island	Number of Individually Advertised Units		Change from 2016
	2017	2016	
Hawai'i Island	8,647	7,431	16.4%
Kaua'i	6,253	5,164	21.1%
Lāna'i	26	16	62.5%
Maui	13,418	10,789	24.4%
Moloka'i	315	367	-14.2%
O'ahu	9,441	8,798	7.3%
State of Hawai'i	38,100	32,565	17.0%

Table 15: Estimated Number of Bedrooms by Island

Island	Total Estimated Number of Bedrooms		Change from 2016
	2017	2016	
Hawai'i Island	16,956	11,990	41.4%
Kaua'i	12,031	7,883	52.6%
Lāna'i	61	37	64.9%
Maui	20,599	13,267	55.3%
Moloka'i	421	387	8.8%
O'ahu	16,441	12,798	28.5%
State of Hawai'i	66,509	46,362	43.5%

In Table 16, data on individually advertised vacation rental units are broken down by island and type. VR Houses and VR Condos represented the overwhelming majority of the units that were individually advertised on the four booking sites analyzed. VR Condos represent the largest share of the state's supply of individually advertised vacation rental units, accounting for 23,742 of the 38,010 units. The 10,850 Maui VR Condos represented the largest share of the state's VR Condos, followed by O'ahu's 4,907 VR Condo units.

VR Houses accounted for the second highest share of individually advertised vacation rental units, with 11,533. Hawai'i Island reported the greatest number of VR Houses, with 3,900, followed by O'ahu's 3,625. In previous years Oahu had accounted for the largest share of VR Houses among the islands.

Individually Advertised Units: Shared Accommodations

Airbnb is the only one of the three booking sites analyzed that lists shared accommodations, meaning the guest is only renting part of a unit. These include Private Rooms (a room within a unit occupied by the host or another guest) or a Shared Room (the guest shares a room with others). As seen in Table 16, shared accommodations represented a small share of the total units listed on Airbnb in Hawai'i during our extraction analysis, with Private rooms accounting for 1,800 units statewide and Shared Rooms contributing another 100 units.

Table 16: Individually Advertised Units by Type

Island	VR House	VR Condo	B&B	Private Room	Shared Room	Other	Total
Hawai'i Island	3,900	3,625	68	798	42	183	8,616
Kaua'i	1,874	4,114	4	166	9	82	6,249
Lāna'i	17	7	-	2	-	-	26
Maui	2,088	10,850	24	288	22	115	13,387
Moloka'i	65	239	-	4	-	7	315
O'ahu	3,589	4,907	23	739	24	135	9,417
State of Hawai'i	11,533	23,742	119	1,997	97	522	38,010

% of total	VR House	VR Condo	B&B	Private Room	Shared room	Other	Total
Hawai'i Island	33.8%	15.3%	57.1%	40.0%	43.3%	35.1%	22.7%
Kaua'i	16.2%	17.3%	3.4%	8.3%	9.3%	15.7%	16.4%
Lāna'i	0.1%	0.0%	0.0%	0.1%	0.0%	0.0%	0.1%
Maui	18.1%	45.7%	20.2%	14.4%	22.7%	22.0%	35.2%
Moloka'i	0.6%	1.0%	0.0%	0.2%	0.0%	1.3%	0.8%
O'ahu	31.1%	20.7%	19.3%	37.0%	24.7%	25.9%	24.8%
State of Hawai'i	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%

Table 17 (page 61) presents data collected on the price categories of individually advertised vacation rental units in Hawai'i. These data can be compared with data collected by the Visitor Plant Inventory survey, which report price category data across a variety of accommodation types.

Based on the data collected from the three vacation rental booking sites, Budget and Standard price class units represented a much larger share of the individually advertised vacation rental units compared with the overall supply of visitor units. Budget-priced units (up to \$100/night) represented 14.6% of the individually advertised vacation rental units, compared with 3.4% of the overall supply of visitor units that were Budget. A majority (54.7%) of the individually advertised vacation rental units were in the Standard price category in 2017, compared with 25.1% of the overall supply of visitor units that provided price class data.

The shares of Budget and Standard (\$101 to \$250/night) individually advertised vacation rental units both increased, indicating that the supply increases at the lower end of the market is driving overall growth.

It should be noted that these data are not strictly comparable due to the fact that the Visitor Plant Inventory survey data are based on self-reported rack rates, generally the highest price that a room rents for. Hotel rooms typically rent for a large discount from the rack rate. The pricing in the vacation rental booking site data represents the price that a particular unit can be rented during a specific point in time. Nevertheless, it does appear that vacation rental inventory is generally lower-priced than the overall supply of Hawai'i's visitor accommodations.

Table 17: Individually Advertised Units by Island and Class of Unit

Island	Class	PERCENT OF TOTAL UNITS		Percentage Point Change from 2016
		2017	2016	
Hawai'i Island	Budget (Up to \$100)	26.1%	23.1%	3.0%
	Standard (\$101 to \$250)	44.5%	52.0%	-7.5%
	Deluxe (\$251 to \$500)	12.3%	15.6%	-3.2%
	Luxury (Over \$500/Night)	5.8%	9.3%	-3.5%
	Total	100.0%	100.0%	
Kaua'i	Budget (Up to \$100)	4.8%	6.6%	-1.7%
	Standard (\$101 to \$250)	53.1%	53.3%	-0.2%
	Deluxe (\$251 to \$500)	27.9%	28.3%	-0.4%
	Luxury (Over \$500/Night)	8.6%	11.8%	-3.2%
	Total	100.0%	100.0%	
Lāna'i	Budget (Up to \$100)	4.2%	7.1%	-3.0%
	Standard (\$101 to \$250)	33.3%	35.7%	-2.4%
	Deluxe (\$251 to \$500)	54.2%	28.6%	25.6%
	Luxury (Over \$500/Night)	8.3%	28.6%	-20.2%
	Total	100.0%	100.0%	
Maui	Budget (Up to \$100)	4.8%	4.6%	0.1%
	Standard (\$101 to \$250)	55.2%	59.5%	-4.3%
	Deluxe (\$251 to \$500)	22.0%	24.4%	-2.4%
	Luxury (Over \$500/Night)	9.3%	11.5%	-2.2%
	Total	100.0%	100.0%	
Moloka'i	Budget (Up to \$100)	28.4%	44.1%	-15.7%
	Standard (\$101 to \$250)	54.6%	52.8%	1.8%
	Deluxe (\$251 to \$500)	5.4%	1.9%	3.6%
	Luxury (Over \$500/Night)	1.3%	1.2%	0.0%
	Total	100.0%	100.0%	
O'ahu	Budget (Up to \$100)	18.9%	16.4%	2.5%
	Standard (\$101 to \$250)	46.3%	51.4%	-5.1%
	Deluxe (\$251 to \$500)	16.9%	18.1%	-1.2%
	Luxury (Over \$500/Night)	10.8%	14.0%	-3.2%
	Total	100.0%	100.0%	
Statewide	Budget (Up to \$100)	14.6%	12.4%	2.1%
	Standard (\$101 to \$250)	54.8%	54.7%	0.1%
	Deluxe (\$251 to \$500)	21.2%	21.3%	-0.1%
	Luxury (Over \$500/Night)	9.5%	11.6%	-2.1%
	Total	100.0%	100.0%	

As shown in Table 18, VR Houses represented a larger share of Deluxe and Luxury vacation rental units than VR Condos, likely due to houses tending to be larger and have a greater number of bedrooms than condominiums. Luxury units (over \$500/night) represented 20.5% of VR Houses in the sample of individually advertised vacation rentals, compared to just 3.7% of the VR Condos. The Budget category (up to \$100/night) of VR House increased its share of the VR House category to 18.4% in 2017, up from 13.8% in 2016. All other price classes of VR Houses saw their share of the VR House market decrease in 2017.

Approximately two-thirds of the VR Condos (65.1%) reported nightly rates in the Standard Class (\$101 to \$250/night).

Table 18: Individually Advertised Units by Type and Class of Unit

Property Type	Class	PERCENT OF TOTAL UNITS		Percentage Point Change from 2016
		2017	2016	
Vacation Rental House	Budget (Up to \$100)	18.4%	13.8%	4.6%
	Standard (\$101 to \$250)	36.3%	37.3%	-1.0%

	Total	100.0%	100.0%	

Individually Advertised Vacation Rental Units and Housing Units

As shown in the tables below and island maps on the following pages, most of the individually advertised vacation rental units were located within the state's resort areas. It is likely that most of these units have historically been available as visitor units and as such are accounted for in the Visitor Plant Inventory survey. For such units, the four booking sites studied represent a relatively new channel of distribution.

While the largest numbers of individually advertised vacation rental units were located within traditional resort areas, the tables also show that there were vacation rentals available in almost every zip code across the state.

Table 19: Hawai'i Island: Individually Advertised Units by Zip Code

City/Area	Zip Code	Individually Advertised Units	Housing Units	Individually Advertised Units per 100 Housing Units
Captain Cook	96704	439	2,938	14.9
Hakalau	96710	48	275	17.5
Hāwī	96719	85	655	13.0
Hilo	96720 / 96721	431	17,770	2.4
Hōlualoa	96725	109	1,469	7.4
Hōnaunau	96726	26	271	9.6

Estimate of Total Number of Individually Advertised Vacation Rentals

As discussed previously, the lack of unique identifying information in most vacation rental listings made identifying and eliminating duplicate listings difficult. The listings that did include unique identifying information allowed for several thousand duplicate listings to be identified. Based on an estimate of the incidence of duplication among the units not associated with unique identifiers, there were an estimated 15,000 additional duplicate listings among the 38,10 individually advertised vacation rental listings analyzed. The estimated total number of unique vacation rentals advertised on the three sites was approximately 23,000 units in 2017.

Table 24: Number of Lodging Units in the State of Hawai'i by Type

Lodging Type	2017		2016	
	Units	% Mix	Units	% Mix
Hotel	44,431	47.8%	43,912	50.9%
Condo Hotel	10,875	12.1%	10,918	12.6%
Timeshare	11,062	12.1%	10,716	12.4%
Hostel	311	0.3%	307	0.4%
Apartment Hotel	101	0.1%	99	0.1%
Other	390	0.4%	399	0.5%
Individually Advertised Units (Vacation Rentals)	23,000	27.1%	20,000	23.2%
Total	90,170	100.0%	86,351	100.0%

METHODS AND PROCEDURES: Individually Advertised Units In Hawai'i

The analysis of individually advertised vacation rentals in the State of Hawai'i was performed based on data extracted from three booking websites:

- Airbnb
- TripAdvisor
- Homeaway

In previous years, four websites were used for the study; Airbnb, ClearStay, Flipkey by TripAdvisor, and VRBO. With changes in the online vacation rental marketplace, we change our methods to provide the most accurate overview of the Hawai'i online vacation rental market.

Data Extraction

Commercially available software was used to extract data from the three booking websites. The extractions were conducted between August 24th and August 25th. For each unit listed on each of the three booking websites, we attempted to extract the following data:

- Property Name
- Property Identification Number
- Property Description
- Island
- Area
- Property Type
- Number of Bedrooms
- Number of Bathrooms
- Number of Guests unit Accommodates
- Nightly Rate
- Property Image
- Listing URL
- Host Name or Operator

The data extracted from each booking website were exported into an Excel file for processing.

Housing Data

Housing data for all islands was obtained from the U.S. Census Bureau's 2010 Census data.

Data Processing

The data in the Excel files were sorted by location. The first screening for duplicate listings was based on unique property codes, where possible. All three of the websites either assign unique numbers to each listing or had a unique number in other parts of the data. Next, duplicated property names were identified for detailed investigation. Our review of the data indicated that, while some of the duplicated property names represented multiple listings for a property within a booking site, many of the duplicated names did not. It appears that some vacation rental managers use the same property name for multiple vacation rentals, often promoting a promotional rate or offer such as "Free Rental Car with Booking." In many cases these were determined to be distinct properties because of the differences in other information such as price or number of bedrooms. For listings with a high degree of duplicated information, we reviewed the web pages of the listings in question to view the property photos.

Next, we de-duped the data across the three booking websites to the extent possible. The first step was to screen for identical property names across multiple booking sites. Next, we cross checked between booking sites based on unique identifiers such as unit numbers or address. This method is limited by the availability of unique location identifiers in the extracted data.

Most of the duplicate listings identified and eliminated in this process were properties that were listed on more than one of the three websites.

Despite the limitations of the process, we were able to identify and eliminate approximately 10,000 duplicate listings from the data set.

Data Cleaning

To allow the data to be analyzed by geographical areas consistent with the Visitor Plant Inventory data, we assigned zip codes to listings that did not include zip code data. In 2017, none of the three websites used for the provided zip code. In most instances this entailed assigning a zip code based on the area data extracted for each listing. The data extracted for some listings did not allow for identification of the property's geographic location, which necessitated reviewing the listing web pages to determine the property's location.

DEFINITIONS: Individually Advertised Units In Hawai'i

Type of Units

An individual property may include more than one type of unit. If a property has more than one unit type, the majority unit type was used to determine the property type for the purposes of this report. Units were categorized as follows:

Bed & Breakfast (B&B): A lodging facility with a limited number of guest units, available for short-term rental. Services include breakfast in the daily rental rate. Typical bed and breakfast facilities may be small, quaint inns or family homes.

Vacation Rental Unit (VRU): An individual vacation rental unit available for visitor use on a short-term basis (30 days or less). VRs usually include kitchens, laundry facilities, and parking garages. Services are very limited although some may include some housekeeping service.

- **Vacation Rental in a Condominium Hotel (VR-Condo):** A condominium hotel unit available for visitor use on a short-term basis. VR-Condos are not rented or managed by the condominium hotel management, but are available through individual owners, property managers, or Internet agencies.
- **Vacation Rental House (VR-House):** A single-family dwelling property available for visitor use on a short-term basis. May be a house, townhouse, duplex, multiplex, cabin, villa or cottage, where the owner does not reside on the property.

Private Room: Accommodations where a visitor rents a private room for sleeping, but share common areas such as kitchen, livingroom, or bathroom with others. The host is the main resident.

Shared Room: Accommodations where a visitor share the entire space with others and do not have a private room to themselves. The host is the main resident.

Other: Includes lodges, inns, or any other form of property not included in the above definitions.

Class of Units

The Visitor Plant Inventory survey also included questions about the class of units at each property. The subsequent tables show the percent of each class of units available by island. Units were classified as follows:

Class	Price Range (Rack Rate)
Budget	Up to \$100 per night
Standard	\$101 to \$250 per night
Deluxe	\$251 to \$500 per night
Luxury	Over \$500 per night
